Subscription Account Product and Services Description

01. Definitions

Fygen is an innovative B2B online platform (SaaS) running under www.fygen.com. We provide subscription-based access to real-time industrial business data for your selected industries. Fygen.com is a service of Scoopforce GmbH, Friedrichstrasse 75, 10117 Berlin, Germany (Licensor). “Fygen Real-time Industrial Monitor” means the current combination of the Licensor’s Database categories of information.

Fygen Real-time Industry Monitor allows Authorized Users (Licensees) to quickly and efficiently access relevant information on a wide variety of markets and manufacturing industries. Benefits of Fygen services include industrial and product specific data, which helps you to watch selected manufacturing businesses in real time at single factory level, connect you to the global markets, investigate the trends of development, make strategic decisions, and more.

02. Setup your industries and navigation

Fygen Real-time Industry Monitor allows Users to setup their industry(s). After the subscription and the payment process, Users will be directed automatically to a new page and Users can start setting up the industry(s). After the setup, Users can then find the navigation function simply at the top of the platform.

Fygen platform offers currently available industries for Authorized Users. Depending on the subscription plans (Details in section **06**), Users can gain access to their selected industry(s).

03. One license for the whole platform

Fygen Real-time Industry Monitor offers currently available data, i.e. factory activity level in different industries. After a successful payment process and the selection of industry(s), you can find your available industries under “My invoices/info”.

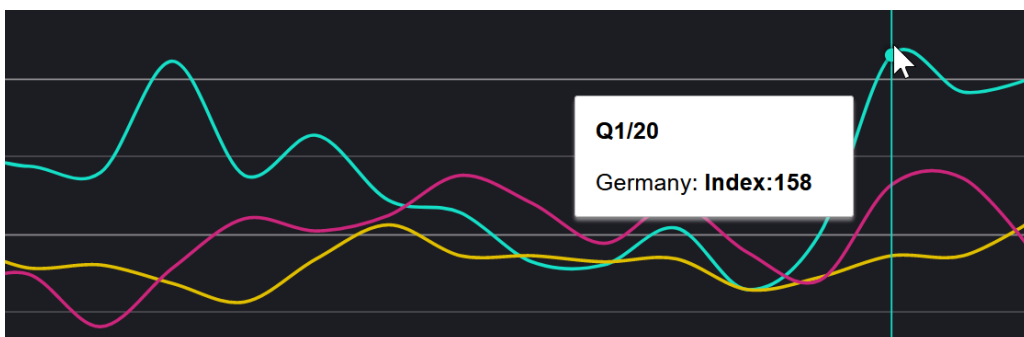

Fygen collects, evaluates, and publishes key data on relevant subjects, providing Users with a comprehensive overview of available information on a specific topic.

04. User interface and interactive controls

Fygen platform offers currently available data categories (i.e. Factory Activity Level and Values of Production). Users can switch between monitor tabs by simply clicking on them.

Under our interactive graph, Fygen enables the mouse-hover function as a user-friendly feature for displaying the selected data point in different geographic regions.

Current changes in percentage are calculated according to the datasets reported from individual geographic region. More analytic details can be found by clicking on the symbol “info”. When clicking on the card, it will direct the Users automatically to a new page consisting of an overview dataset(s) with the selected region.

Under the specific tab “Factory Activity Level”, Fygen facilitates the search feature “Select a single factory” with filters or keywords, allowing Users to quickly and efficiently locate individual factories currently available.

05. Implementation and Handling of Sources

Fygen provides naming and description of the original source (i.e. an official statistical office) if available online. In other cases, the data is based on own research and calculations or on expert opinions. The display of normalized indexes or quantitative data are clearly stated in different cases. Statistical Normalization is automatically generated according to our selected reference data point. Geolocation data collection procedure strictly follows General Data Protection Regulation (GDPR) and California Consumer Privacy Act (CCPA).

06. Service Description and duration of subscription

The following includes a brief description of services offered by subscription plans. All subscription plans offer a quarterly (3-month) subscription period. The complete *Terms and Conditions* can be found on our website.

At least one industry has to be selected before submitting the subscription request by clicking "PURCHASE NOW".

New customer? Get Pro Version

To see all data and to keep informed on all updated for the duration of one year, just order our Pro version with a few clicks. At first, make sure to select the product category or categories which you need. The access to all up-to-date data will be possible immediately after your payment was done successfully.

Power transformers €599 per quarter

Get full access to and the [transformer industry monitoring tool](#) and the [factory database](#). The transformer industry monitoring tool provides you with a real-time X-ray image of: Current factory loads (activity levels) for the largest transformer factories worldwide. Update frequency: daily. Current values of production for 3 leading industry nations and global trade flow. Update frequency: monthly. The factory database covers all existing transformer factories globally (>1 MVA).

Grain Oriented Electrical Steel €199 per quarter

The [database](#) comprises of all latest product information from all existing producers of electrical steel in the world in one domain. This includes Manufacturer, Core Type, Internal Company Grade, JIS Grade, ASTM Grade, Thickness, Core Loss, Lam Factor, Finishing. Our advanced search technology enables you to compare easily between all products.

Fygen shall issue a quarterly invoice for subscribing any of the selected plans upon acceptance of our offer. Payment for your 3 months subscription is due before activation of your account. Use of a subscription plan is available only to the Authorized User.

07. subscription cancellation

Under "My account", subscription can be cancelled at any time by clicking Renewal Date / "Cancel", as shown in below screenshot.

Basic Plus

Started at	End at	Status
2021-01-19 10:38:00	2021-04-19 10:38:00	Active
Renewal Date	Industries selected	
2021-04-19 10:38:00 Cancel	1 of 2	

All subscription plans enable User to get access to the Fygen Platform available data, graphs and information related to the selected industry(s). This also includes any updates (i.e. expansion of available data) of industries in the platform during the corresponding subscription period. Cancellation of subscription is possible with two clicks in the account settings at any time.

08. Technical Notes

Technical requirements for Fygen include an up-to-date internet browser. The internet browser must allow the running of scripts, for example JavaScript, requested from the Fygen website.

09. Rights to Publication

Publication rights are **NOT** included in any kind of license. All registered Users acquire a simple right of usage for private use. A right of use for commercial purposes is not granted.

Licensee may not, nor allow its employees to redistribute, sublicense, disseminate, publish, display, prepare derivative works based on, change, modify, alter or distribute in any form to any third party any of the Fygen Information, in any manner without the prior written consent of Licensor. Licensee receives no ownership rights hereunder.
